|   | South Ditch, group C no.2.                             | AD30-50●   |

Notes

The basic shape is Cam. 241, or G2-5. The fabric is romanised, hard, usually grey, at Sheepen; and Ardleigh, which has produced several (some Roman). At the end of the 1st century AD it becomes Marsh's type 46 (Marsh 1978, 181), in 'London ware' and usually mica-dusted. The form is 'probably an introduction from the Rhineland' (Marsh 1978, 182).
